Profile

I'm a Front-end Developer, enthusiastic about writing JavaScript.

Key skills

TypeScript, Angular, Storybook

Work experience

Application Developer

IBM Taiwan, Taiwan | Dec 2017 - Present

Acted as a Front-End developer under the design team of IBM Taiwan's iX (CT) team, responsible for implementing UI components for use several project teams.

1. Participated in several online banking development projects, implemented the design drafts into front-end layout and components, mainly used Angular Typescript and Storybook to build UI library, product platform includes: PC web, mobile webview app.

- Very familiar skills: TailwindCSS, PrimeNG, Angular, CKEditor, Storybook
- Familiar skills: React, Framework7, Ionic, Highchart, Web Component, Amplify, Webpack, Bootstrap, jQuery

2. Acted as design group leader in some projects. The work includes:

- Communicated with project stakeholders to plan project schedules.
- Gathered UX designers and FE developers to set weekly goal and host weekly meetings.
- Developed initial UI drafts and Axure wireframe.
- Implemented UI components and prototype weekly.

Volunteer experience: 2021 65th EWC (Welfare Committee)

Acted as CTO, planned and executed IT-related project.

1. Redesign of the weekly EWC newsletter

- Abandoned the previous one-picture flow newsletter approach, introduced Figma in workflow process, re-created the layout to achieve a real HTML newsletter.

2. Make good use of company community channel: Slack

- Created an official Slack chatbot, using Node.JS and Slack Block Kit Builder (UI interface). The functions includes simple FAQ response, and collaborative functions in conjunction with EWC scheduled events.

Japanese EC Site Assistant

Uitox, Taiwan | Jul 2016 - Feb 2017

Responsible for the logistics, shipping, translation, submission, and marketing activities of cross-border e-commerce business (Taiwan to Japan, fast fashion)

1. Japanese interpretation and translation

- Serve as a window assistant, translating Japanese emails to and from Japan, interpreting Skype conference calls, interpreting on-site business trips, etc.

2. Product management

- Chinese-Japanese translation and Japanese marketing copywriting for scheduled products.
- Logistics shipping procedures, product registration.
