

# Yi An Chen

ianchen0419@gmail.com

## Summary

Detail-oriented Front-End Developer with design sense. Strongly skilled at HTML, CSS, JavaScript, Angular. Partially skilled at React, Node.JS.

After several years of working closely with different stakeholders such as designers, project managers, and other engineers to develop finance products, I am good at cross platform communication in a remote way.

## Work Experience

### IBM Taiwan

Front-End Developer

2017 – Present

- Develop UI components of banking systems by using HTML, CSS, JavaScript, Angular with cross-browser optimization and multi-platform compatibility.
- Work closely with designers, business analysts, backend engineers in remote environment to meet project requirements and goals.
- Host weekly sharing in the Front-End team, write down my findings in a week and tell it to other people.

### Uitox (ASAP e-Commerce website)

Japan Account Assistant

2016 – 2017

- Maintain and translate shop items to a cross-border online shop. To avoid routine tasks, I developed a simple web application to translate Chinese item titles to Japanese.

## Education

### Soochow University

Bachelor's Degree: Japanese / International Business  
(Double Major)

2012 – 2016

## Skills

- HTML / CSS / JavaScript
- Angular / TypeScript
- Swift / SwiftUI
- Git
